Our Vision

Our Vision is that policies will be implemented that encourage in-fill in developed urban, suburban and rural centers. The majority of.

Reaching the Vision

1. Collect and objectively evaluate regional land use and other growth abatement approaches.
2. Actively engage local governments, citizens and stakeholder groups in examining implications of these trends on the region’s future.
3. Identify and evaluate alternatives to these trends.
4. Formulate consensus on a shared regional vision about a preferred alternative.
5. Develop tools, techniques and action strategies to implement the shared vision and preferred alternative.
6. Establish regional process for monitoring and evaluating progress at implementing these strategies.

Regional Themes & Principles

Government:

Intergovernmental Cooperation & Coordination: Key partnerships and action plans exist among constituent counties and the Tri-County region. Tri-County counties, villages, townships and other governmental bodies coordinate policies and plans for the region to integrate cohesively and economically as a whole.
Implementation Through Local Action: The region follows Tri-County’s strategic plan and specific initiatives.

Ecological Viability:

Economic Viability:

Healthy Economy & Healthy Environment:

Healthy Economy & Healthy Environment: The region should continue to focus on sustainability and development.

Transportation & Other Infrastructure:

Transportation & Other Infrastructure: The region will continue to focus on sustainability and development.

Public Facilities:

Public Facilities: As the region’s economy continues to grow, public facilities such as parks, fire stations, libraries and schools will be developed to serve the region.

Natural Hazards Protection & Emergency Management:

Natural Hazards Protection & Emergency Management: The region will continue to focus on sustainability and development.

Infrastructure Expansion and Replacement:

Infrastructure Expansion and Replacement: The region will continue to focus on sustainability and development.

Open Space & Resource Protection:

Open Space & Resource Protection: Protection of natural resources is critical to the region’s future.

Economic Viability:

Economic Viability: The region will continue to focus on sustainability and development.

Energy Conservation:

Energy Conservation: As the region’s economy continues to grow, energy conservation measures will be developed to serve the region.

Urban Design

Urban Design: As the region’s economy continues to grow, urban planning and design concepts will be developed to serve the region.

Agricultural Planning

Agricultural Planning: As the region’s economy continues to grow, agricultural planning concepts will be developed to serve the region.

Water Management:

Water Management: As the region’s economy continues to grow, water management strategies will be developed to serve the region.

Health Care Delivery:

Health Care Delivery: As the region’s economy continues to grow, health care delivery systems will be developed to serve the region.

Transportation Network:

Transportation Network: As the region’s economy continues to grow, transportation networks will be developed to serve the region.

Waste Management:

Waste Management: As the region’s economy continues to grow, waste management strategies will be developed to serve the region.

Energy Conservation:

Energy Conservation: As the region’s economy continues to grow, energy conservation measures will be developed to serve the region.

Community Planning:

Community Planning: As the region’s economy continues to grow, community planning strategies will be developed to serve the region.

Regional Planning Commission

Regional Planning Commission: As the region’s economy continues to grow, regional planning commission strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agricultural strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.

Environmental Protection:

Environmental Protection: As the region’s economy continues to grow, environmental protection strategies will be developed to serve the region.

Transportation:

Transportation: As the region’s economy continues to grow, transportation strategies will be developed to serve the region.

Economic Development:

Economic Development: As the region’s economy continues to grow, economic development strategies will be developed to serve the region.

Agriculture:

Agriculture: As the region’s economy continues to grow, agriculture strategies will be developed to serve the region.

Development:

Development: As the region’s economy continues to grow, development strategies will be developed to serve the region.

Planning:

Planning: As the region’s economy continues to grow, planning strategies will be developed to serve the region.

Economy:

Economy: As the region’s economy continues to grow, economic strategies will be developed to serve the region.

Health:

Health: As the region’s economy continues to grow, health strategies will be developed to serve the region.
